VRpatients™

Virtual Reality Simulation Builder

Features

Benefits

- Grade objectively
- Use a penlight in virtual reality
- Use templates or create new cases
- BLS & ALS
- Train faster
- Reduce errors
- Modify scenarios
- Track progress

Instructors

- Design scenarios
- Evaluate
- Test competency
- Deploy remotely

Build Unlimited Patient Scenarios-Train Anywhere

VRpatients™ is a fully customizable Virtual Reality simulation builder that puts EMS Educators in the driver's seat. With VRpatients™ you can provide clinical and field experiences for students that meet national standards and fulfill accreditation requirements. With VRpatients™ you can build fully immersive simulations that offer unparalleled CEU training distinctive to your accredited institution.
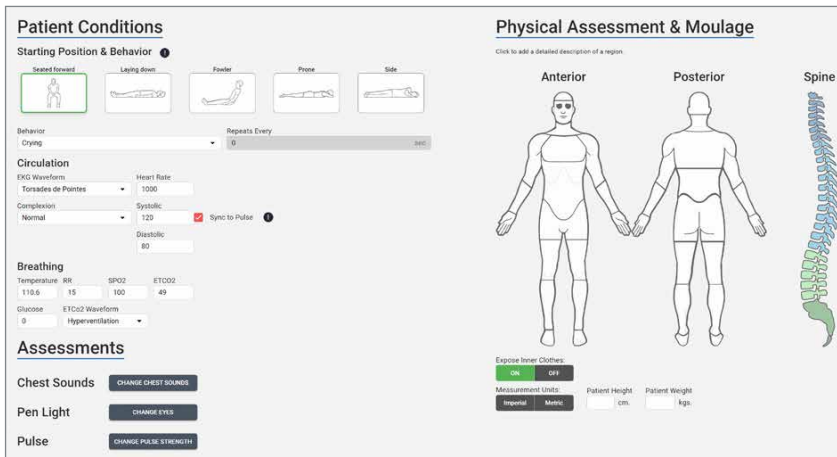

Our simulations represent a diverse population and are physiologically responsive to successful interventions, incorrect treatments, or student inaction. Design your sims and remotely deploy ALS or BLS assignments ensuring students never see the same patient twice. Exceed your predefined competency standards and give students an unparalleled simulation experience in virtual reality or via their web browser.

Accessibility Through Virtual Reality Headset or Web Browser

Additional Features

- 20 custom (pre-loaded) scenarios
- 22 environments
- 132 medication variations
- Premium support
- Help center
- User community
- Tutorial videos

VRpatients™ allows the EMS Educator to objectively assess EMS students to ensure competency and consistent training on local protocols and national guidelines. Increase your efficiency and reduce costs by training faster - anywhere, anytime.

Our Customer Success Team will support your virtual simulation needs and engage your staff at no extra cost. We also include VRpatients™ University, which provides asynchronous video tutorials to ensure your staff's success.

Do not rely on civilian game designers to build single-use simulations for tens of thousands of dollars. The VRpatients™ pricing model is simple, scalable, and affordable; no nickel and dimming. No extra fees to customize your own cases. No extra fees to duplicate and change cases. No extra fees for product upgrades. You get it all.
