

# HANG-DRY®

DRYING GEAR & SUITS OF ANY KIND

[www.Hang-Dry.com](http://www.Hang-Dry.com)

MADE IN THE USA

## What is Hang-Dry®?

- Hang-Dry® is used to dry many different suits and gear with the use of a high-powered fan.
- Hang-Dry® is built out of strong plastic and has a 12ft cord.
- The Hang-Dry® is built to support around 100 lbs and the handle is used for transporting convenience.
- The plastic tubular shape forces the air through the suit with pressure.
- The fan is built out of die-cast aluminum housing and the impeller is steel that is directly welded onto the rotor. The fan is also built with a ball bearing.
- The fan motor's output is 250.1 cfms.
- Hang-Dry® comes with a one-year warranty, which is activated on date of purchase.

## Hang-Dry® can be use to dry:

- |                 |                  |              |
