

HazSim[®]

Hazmat Training Simulation System

Pro 2.0
Quick Specs

The world's most innovative and effective Hazmat training system is now better than ever! With intuitive and scalable new features for growing teams, now is a great time to enhance your Hazmat training with the HazSim Pro 2.0. Already in use with all branches of the U.S. military, homeland security agencies, fire departments, training schools and Hazmat teams, add HazSim to your training agenda.

What's new with HazSim[®] Pro 2.0?

- Unlimited meters and variations including chemical, radiation, and WMD
- Extended range LAN, up to 1000 feet (3 football fields) with option to extend
- Scalable platform for additional HazSim meters
- Larger touch screen and longer battery life
- External buttons allow questions to be answered easily with gloved hands
- Tag function allows instructors to make notes in evolution
