Individual Bleeding Control Kits are available in a **nylon bag**

# Individual Bleeding Control Kits

Stop the bleeding with these easy-to-use tools.

Life threatening bleeding can occur from **everyday emergencies** such as vehicle crashes, incidents involving farming equipment or public transportation; accidental injuries from **natural disasters** like tornadoes; and inflicted injuries from **man-made disasters** such as shootings and bombings.

The small, durable Individual Bleeding Control Kit by North American Rescue is designed to provide essential equipment that can be **utilized by the general public to take action as immediate responders** in stopping life threatening bleeding.

- Available in either a nylon carry bag or vacuum-sealed pouch.
- Includes step-by-step illustrated "Just in Time" pictorial instructions that enable even the untrained provider to help save lives.
- Available in Basic, Intermediate, Advanced OTC and Advanced configurations.

Individual Bleeding Control Kits also available in a **vacuum-sealed pouch**

\*Nylon Bag Option Includes Bleeding Control PVC Patch

# Public Access Bleeding Control Packs

Save lives by stopping life threatening bleeding in the first critical minutes.

Uncontrolled bleeding can result in death within minutes—even before emergency medical services or other emergency responders can arrive. The first minutes following a traumatic injury are crucial in saving a life.

- Provide bystanders and initial first responders with essential medical equipment to take action to stop life threatening bleeding.
- Includes eight (8) Individual Bleeding Control Kits (either nylon bags or vacuum-sealed pouches) that are contained inside of an easy-to-open carrying case.
- Includes one (1) NAR QuikLitter™ used for moving injured casualties.

Nylon bags are easily removed from the carrier via the hook & loop attachment.

Vacuum-sealed pouches are held in the carrier with elastic straps.

## Public Access Bleeding Control Pack Nylon Bags

Rip-stop nylon bags with critical care equipment.

Equip bystanders to apply a tourniquet or pressure dressing and stop life threatening bleeding.

### Public Access Bleeding Control Pack Red Nylon Bags
