

# Setcom® LiberatorMAX™

## Wireless Apparatus Intercom System

LiberatorMAX is the most advanced wireless headset communications system for fire apparatus.

- 1,500 feet of range
- Up to seven headsets per channel
- Eight talk group channels
- Option to connect mobile and/or portable radio
- Applications Include: brush truck, engine, ladder, ambulance, pump operator, search and rescue

LiberatorMAX offers the option to use the headsets stand-alone for intercom purposes or add radio integration:

- Full-duplex intercom capabilities are available within the headsets, no base station required.
- Instantly connect to a portable radio with a portable radio accessory cable.
- One base station wirelessly connects up to seven headsets for both intercom and radio-transmit capabilities when mobile radio integration is needed.

### Ordering is Simple:

**Step #1:** Choose quantity of headsets (Each headset includes a wall charger, power cable and hanger hook)

**Step #2 (If mobile radio integration is needed):** Choose one master station and the appropriate radio cable

**Step #3 (If portable radio integration is needed):** Choose the appropriate portable radio adapter cable
